

EMMANUEL JOHN AYARMA

Full-Stack Software Engineer | Java/Spring Boot · .NET · Laravel · Vue.js · Cloud & API Systems
johnayarmahe@gmail.com | linkedin.com/in/emmanuel-john-ayarma | github.com/ejayarma

PROFESSIONAL SUMMARY

Full-stack software engineer with 3+ years building and scaling web applications, RESTful APIs, and mobile solutions across fintech, civic-tech, agri-tech, and ERP domains. Proven track record delivering national-scale systems ahead of schedule, cutting developer onboarding time by 50%, and sustaining 99%+ uptime for platforms serving thousands of users. Skilled across Java/Spring Boot, .NET Core, Laravel, Flask/FastAPI, and Vue.js, with hands-on experience in PostgreSQL, Redis, Nginx, AWS, and Agile/Scrum delivery. Comfortable owning a feature from API design through deployment and production support.

CORE COMPETENCIES

Full-Stack Development · RESTful API Design & Integration · Spring Boot · .NET Core · Laravel · Flask/FastAPI · Vue.js · Flutter (Cross-Platform Mobile) · PostgreSQL & MySQL · Redis · Nginx · AWS Cloud · Microservices & Multi-Tenant Architecture · Agile/Scrum · CI/CD & Dev Environment Optimization · Java · Python · C# · PHP · JavaScript

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jan 2026 – Present

Adaptive Computer Solutions, Ghana

- Re-engineered enterprise developer environments (local stack setup, tooling, and test configuration), cutting environment provisioning and testing time by 50% and accelerating feature delivery for the engineering team.
- Designed and built secure, scalable backend APIs in Spring Boot and .NET Core for enterprise clients, supporting production workloads of over 1 million requests/day while meeting client security and compliance requirements.
- Partnered with client stakeholders to translate business requirements into API contracts and service designs, reducing integration back-and-forth and rework by 30%.

Full Stack Developer

Nov 2022 – Sept 2025

Npontu Technologies, Ghana

- Built and maintained full-stack web applications (Vue.js, Laravel, Flask) supporting enterprise client workflows for 5 active clients, contributing to 20% improvement in platform reliability.
- Designed responsive, accessible Vue.js interfaces that improved task completion speed and user satisfaction scores by 30%.
- Architected and shipped RESTful APIs and backend services enabling secure third-party integrations across 5 partner systems, with zero reported data-security incidents.
- Developed cross-platform mobile applications in Flutter, reducing manual operational steps for client teams by 50% and extending service access to 1000+ additional users.

Head Web Developer, Web Team

2021 – 2022

National Union of Presbyterian Students (NUPSG), KNUST

- Led a student web development team to design, build, and deploy a Vue.js/Laravel platform within a 3-month deadline, on time and within scope.
- Collaborated with product designers to implement user-centered features, improving usability and satisfaction across a 2,000+ member user base.
- Owned uptime and maintenance for databases, servers, and web applications serving 2,000+ union members, sustaining 99%+ uptime.
- Introduced proactive security controls (access management, hardening, monitoring) that protected sensitive member data with zero breaches during tenure.

- Maintained and optimized the company's production website, sustaining high availability and reducing average incident resolution time by 25%.

KEY PROJECTS

Ghana Births & Deaths Registry Harmonisation and Digitalisation (World Bank-funded)

- Delivered full-stack features (Laravel, JavaScript) for a national digital identity and civil registration system serving millions of citizens, completing assigned milestones ahead of schedule.

Kedebah ERP System

- Built scalable, loosely coupled module APIs for a multi-tenant ERP system (Flask, Laravel, Redis, Nginx, PostgreSQL), reducing API latency by 20% and increasing throughput to support over 100 concurrent tenants.

HubConnect Mobile Application

- Developed a mobile platform connecting agricultural stakeholders, reducing post-harvest losses to near-zero and expanding farmer access to agrochemical and agri-input resources for over 1000 users.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Computer Engineering — Kwame Nkrumah University of Science and Technology (KNUST)

AWS Certified Cloud Practitioner — Amazon Web Services (2026 – 2029)
